Program Information

Course Description

AI Workforce Enablement for Recruitment Modernization is a three-day executive education program designed to help U.S. Army Recruiting Division (USARD) leaders and staff understand and apply artificial intelligence to modernize recruiting operations. Through expert instruction, interactive discussions, and hands-on exercises, participants will explore AI, generative AI, machine learning, and responsible AI practices while learning how these technologies can improve operational efficiency, decision-making, applicant engagement, workflow automation, and data-driven recruiting strategies.

The program features two role-specific learning tracks tailored to participants' responsibilities and experience, culminating in a collaborative capstone that brings both groups together to develop practical AI-enabled recruiting modernization concepts. Upon completion, participants will be prepared to identify high-impact AI opportunities, evaluate AI solutions responsibly, and support the adoption of AI across the recruiting enterprise to improve mission outcomes.

Delivery Components

Dates and Times (3 Days)

Day 1: Tuesday, August 18 07:30–17:00
Day 2: Wednesday, August 19 07:30–17:00
Day 3: Thursday, August 20 07:30–16:00

Modality/Location

In-Person

[JHU Applied Physics Laboratory](#)
Building 201
11091 Johns Hopkins Rd.
Fulton, MD 20759

Hotel

[Homewood Suites](#)
7531 Montpelier Rd.
Laurel, MD 20723
(240) 360-2725

Meals

Breakfast and lunch are included as part of the course.

Day 1

07:30 Breakfast at JHU Applied Physics Laboratory
11:30 Lunch at JHU Applied Physics Laboratory

Day 2

07:30 Breakfast at JHU Applied Physics Laboratory
12:00 Lunch at JHU Applied Physics Laboratory

Day 3

07:30 Breakfast at JHU Applied Physics Laboratory
12:00 Lunch at JHU Applied Physics Lab

Transportation

JHU Applied Physics Laboratory shuttle provided for transportation from Homewood Suites. Transportation from other properties is the responsibility of the participant.

Shuttle Daily Schedule

AM: 07:20 and 07:30 - Pick up from Homewood Suites.

PM: 17:00 - Pick up from JHU Applied Physics Laboratory or upon course conclusion.

For those who are driving themselves, parking is free. Follow this [link](#) to view a map of parking locations at JHU Applied Physics Laboratory. Please note Building 201 is located on the South Campus (11091 Johns Hopkins Road, Laurel MD 20723)

Course Outcomes

1. **Define key artificial intelligence terms** and explain how AI, machine learning, generative AI, and agentic AI can support Army recruiting.
2. **Identify recruiting decisions and workflows that could benefit from AI**, with emphasis on precision recruiting, recruiter productivity, pipeline visibility, and candidate engagement.
3. **Apply the R.O.A.D. Framework**—Requirements, Operationalize Data, Analytics/Algorithms, and Deployment—to structure and manage AI initiatives.
4. **Evaluate AI performance measures and tradeoffs**, including accuracy, precision, recall, false positives, false negatives, and the importance of clearly defined outcome labels.
5. **Assess data readiness, consistency, bias, security, and human-oversight requirements** before developing or deploying an AI-enabled recruiting solution.
6. **Develop and present an actionable AI concept for Army recruiting** that defines the operational requirement, required data, analytic approach, deployment path, risks, and measures of success.

Certificate of Completion

All participants that successfully complete the course will receive a Digital Certificate of completion from Johns Hopkins Engineering Executive and Professional Education.

Faculty

Dean Fisher

Dean.Fisher@jhuapl.edu

Dean Fisher is a retired U.S. Navy officer with 24 years of service as an Information Warfare/Cryptology Officer, bringing deep expertise in SIGINT gained through extensive global deployments aboard submarines and reconnaissance aircraft. He is now a Principal Professional Staff member at the Johns Hopkins University Applied Physics Laboratory, where he specializes in artificial intelligence, autonomy, and C4ISR systems engineering. He also serves as an adjunct professor at Johns Hopkins University, teaching in the field of artificial intelligence. Dean holds a Bachelor's degree in Information Systems Management from the University of Maryland, graduate study in Information Warfare at the Naval Postgraduate School, and Systems Engineering at the Johns Hopkins Whiting School of Engineering. He brings a career built on operational military intelligence and systems engineering to his current work at the intersection of AI and mission-critical technology.

Caleb Frey

cfrey7@jh.edu

Caleb Frey is an AI researcher who works at the Johns Hopkins University Applied Physics Lab, developing novel exploratory workflows and data visualization techniques for global health and critical infrastructure. His work involves operationalizing large-scale exploratory workflows for the Center for Disease Control and Prevention and researching latent pattern discovery in the cyber domain. He holds a master's degree in Artificial Intelligence from the Johns Hopkins University and spent time throughout his degree researching both data-derived solutions to adversarial behavior in critical infrastructure and large-scale AI-driven data analytics.

Dr. Jim Liew

jim@sokat.com

Dr. Jim Kyung-Soo Liew leads the development of AI and Agentic AI in Finance for the Johns Hopkins Whiting School of Engineering's Executive Education division. He recently retired after 13 years on the faculty of the Johns Hopkins Carey Business School, where he taught more than 5,000 students in courses including Advanced Hedge Fund Strategies, Big Data Machine Learning, AI Essentials for Business, Entrepreneurial Finance, and Cryptocurrencies and Blockchain. He serves on the editorial boards of the Journal of Portfolio Management, Journal of Alternative Investments, and Journal of Financial Data Science, and co-authored the most-read invited editorial "iGDP?" His research

spans quantitative finance, AI, and emerging technology, with early contributions at the intersection of social media, big data, blockchain, and financial markets.

Dr. Liew is also President and co-founder of SoKat Consulting, LLC, an SBA 8(a)-certified federal AI contractor headquartered in Baltimore, Maryland. Under his leadership, SoKat has become a recognized force in federal AI delivery, earning innovation honors from ACT-IAC, the VA NAI Tech Sprint, the GSA Applied LLM Challenge, and the IRS Program, while deploying production AI systems across the Department of Veterans Affairs, HHS Centers for Medicare & Medicaid Services, the U.S. Department of the Treasury, and the Office of the Comptroller of the Currency (OCC).

Dr. Ian McCulloh

imccull4@jhu.edu

Dr. Ian McCulloh leads the Johns Hopkins University Artificial Intelligence portfolio for Lifelong Learning providing a range of continuing and executive education courses. He maintains faculty appointments in Computer Science and Public Health. His research combines neuroscience, artificial intelligence (AI), and human behavior to develop at-scale AI systems that improve peoples' access to products, services, and healthcare. He has authored three books and over 100 peer-reviewed scientific papers. Previously, McCulloh served as Accenture's Chief Data Scientist and managing director of their Federal AI practice. He is a retired Army officer known for establishing the Army Network Science Center and the Advanced Network Analysis and Targeting (ANAT) program. McCulloh holds a Ph.D. from the Carnegie Mellon University School of Computer Science, three master's degrees in engineering, statistics, and sociology.

Keegan Woodburn

Keegan.Woodburn@jhuapl.edu

Keegan Woodburn is an AI engineer at the Johns Hopkins University Applied Physics Lab, where he develops AI and data-driven systems for challenges in global health, critical infrastructure, cybersecurity, and large-scale data analytics. His work includes developing data-analytics platforms for the Centers for Disease Control and Prevention, developing novel algorithms for the defense of industrial control systems, and building machine-learning and MLOps capabilities for cyber analysis and tooling. He holds a master's degree in artificial intelligence from Johns Hopkins University.

Course Schedule

JHU Applied Physics Laboratory (APL)

AGENDA

Day One | Tuesday, August 18, 2026

Time	Event	Host/Instructor	Location
07:20 07:30	Shuttle Available from Homewood Suites to APL	JHU	Homewood Suites
07:30-08:00	Networking Breakfast	USARD & JHU	201-106 Breakout
08:00-08:15	BG Dudley Welcome Remarks	USARD	201-117 Auditorium
08:15-08:30	Introduction to AI	Dean Fisher	201-117 Auditorium
08:30-09:15	Definitions and Foundations	Dean Fisher	201-117 Auditorium
09:15-10:15	The AI Enabled Force	Dean Fisher	201-117 Auditorium
10:15-10:30	Coffee Break	USARD & JHU	201-106 Breakout
10:30-11:30	Trends that Matter	Dean Fisher	201-117 Auditorium
11:30-12:30	Lunch	USARD & JHU	201-106 Breakout
12:30-14:00	R.O.A.D Framework	Ian McCulloh	201-117 Auditorium
14:00-14:15	Coffee Break	USARD & JHU	201-106 Breakout
14:15-15:45	Measuring Performance (Hands-on)	Ian McCulloh	201-117 Auditorium
15:45-16:45	Practical Exercise: Requirements	Ian McCulloh	201-117 Auditorium
16:45-17:00	Daily Wrap-Up	Ian McCulloh	201-117 Auditorium
17:00	Shuttle Available from APL to Homewood Suites	JHU	201 Lobby

Day Two - Technical | Wednesday, August 19, 2026

Time	Event	Host/Instructor	Location
07:20 07:30	Shuttle Available from Homewood Suites to APL	JHU	Homewood Suites
07:30 – 08:00	Networking Breakfast	USARD & JHU	201-106 Breakout
08:00 – 09:15	Responsible AI	Ian McCulloh	201-117 Auditorium
09:15-09:30	Coffee Break & Transition to Break Outs	USARD & JHU	201-120 Breakout
09:30-10:00	Orientation & Pipeline Integrity Lab	Caleb Frey Keegan Woodburn	201-120 Breakout
10:00-11:00	Hands-On: Pipeline Integrity Lab	Caleb Frey Keegan Woodburn	201-120 Breakout
11:00-11:15	Break		201-106 Breakout
11:15-11:30	Recommender Systems	Caleb Frey Keegan Woodburn	201-120 Breakout
11:30-12:00	Hands-on: Recommender Lab A	Caleb Frey Keegan Woodburn	201-120 Breakout
12:00-13:00	Lunch	USARD & JHU	201 Lobby
13:00-13:45	Hands-on: Recommender Lab B	Caleb Frey Keegan Woodburn	201-120 Breakout
13:45-14:15	Generative & Agentic AI, RAG	Caleb Frey Keegan Woodburn	201-120 Breakout
14:15-15:15	Hands-on: RAG	Caleb Frey Keegan Woodburn	201-120 Breakout
15:15-15:30	Break		201-106 Breakout
15:30-16:15	Hands-on: Agentic Integration	Caleb Frey Keegan Woodburn	201-120 Breakout
16:15-16:45	Test, Evaluation, Red Team	Caleb Frey Keegan Woodburn	201-120 Breakout
16:45-17:00	Daily Wrap-up	Caleb Frey Keegan Woodburn	201-120 Breakout
17:00	Shuttle Available from APL to Homewood Suites	JHU	201 Lobby

Day Two - Executive | August 19, 2026

Time	Event	Host/Instructor	Location
07:20 07:30	Shuttle Available from Homewood Suites to APL	JHU	Homewood Suites
07:30 – 08:00	Networking Breakfast	USARD & JHU	201-106 Breakout
08:00 – 09:15	Responsible AI	Ian McCulloh	201-117 Auditorium
09:15-09:30	Coffee Break and Transition to Break Outs	USARD & JHU	201-106 Breakout
09:30-10:30	Generative AI & LLMs	Ian McCulloh Jim Liew	201-117 Auditorium
10:30-12:00	Practical Exercise: Build a Custom GPT	Ian McCulloh Jim Liew	201-117 Auditorium
12:00-13:00	Lunch		201-106 Breakout
13:00-13:30	Test and Red Team the GPT	Ian McCulloh Jim Liew	201-117 Auditorium
13:30-14:30	Grounded and Agentic AI	Ian McCulloh Jim Liew	201-117 Auditorium
14:30-14:45	Coffee Break		201-106 Breakout
14:45-15:30	Roles, Adoption, Accountable	Ian McCulloh Jim Liew	201-117 Auditorium
15:30-16:45	PE: Design RAI Recruit Initiative	Ian McCulloh Jim Liew	201-117 Auditorium
16:45-17:00	Daily Wrap-Up	Ian McCulloh Jim Liew	201-117 Auditorium
17:00	Shuttle from APL to Homewood Suites		201 Lobby

Day Three - Technical | Thursday, August 20, 2026

Time	Event	Host/Instructor	Location
07:20 07:30	Shuttle Available from Homewood Suites to APL	JHU	Homewood Suites
07:30 – 08:00	Networking Breakfast	USARD & JHU	201-106 Breakout
08:00-08:30	Executive-Technical Recap	Caleb Frey Keegan Woodburn	201-120 Breakout
08:30-09:45	End-to-end Application with CODEX	Caleb Frey Keegan Woodburn	201-120 Breakout
09:45-10:00	Coffee Break		201-106 Breakout
10:00-12:00	Capstone Lab	Caleb Frey Keegan Woodburn	201-120 Breakout
12:00-13:00	Lunch	USARD & JHU	201-106 Breakout
13:00-14:30	Capstone Presentations	Caleb Frey Keegan Woodburn	201-120 Breakout
14:30-14:45	Break		201-106 Breakout
14:45-15:30	LLM-as-a-Judge	Caleb Frey Keegan Woodburn	201-120 Breakout
15:30-16:00	Course Wrap-up & Evaluation	Dean Fisher Jim Liew	Auditorium
16:00	Shuttle Available from APL to Homewood Suites	JHU	201 Lobby

Day Three - Executive | August 20, 2026

Time	Event	Host/Instructor	Location
07:20 07:30	Shuttle Available from Homewood Suites to APL	JHU	Homewood Suites
07:30 – 08:00	Networking Breakfast	USARD & JHU	201-106 Breakout
08:00-08:30	Executive-Technical Recap	Ian McCulloh	201-117 Auditorium
08:30-09:45	AI Applications & Requirements	Ian McCulloh	201-117 Auditorium
09:45-10:00	Coffee Break		201-106 Breakout
10:00-11:30	AI Applications & Requirements with Gen AI	Ian McCulloh	201-117 Auditorium
11:30-12:00	Prepare Presentation	Ian McCulloh	201-117 Auditorium
12:00-13:00	Lunch	USARD & JHU	201-106 Breakout
13:00-14:30	Capstone Presentations	Dean Fisher Jim Liew	201-117 Auditorium
14:30-14:45	Break	USARD & JHU	201-106 Breakout
14:45-15:30	LLM-as-a-Judge	Dean Fisher Jim Liew	201-117 Auditorium
15:30-16:00	Course Wrap-up & Evaluation	Dean Fisher Jim Liew	201-117 Auditorium
16:00	Shuttle from APL to Homewood Suites	JHU	201 Lobby

Accessibility and Disability Accommodations

As Johns Hopkins University works to foster diversity and build a campus culture of inclusion, it is committed to ensuring people with disabilities enjoy full participation in the university's programs, services, and benefits. Johns Hopkins seeks the continuous improvement of accessibility on its campuses and in its activities and prohibits unlawful discrimination on the basis of disability.

New Students/Learners

To establish eligibility for disability-related accommodations and services:

1. Complete the [SDS online application](#) through our university-wide database, Accommodation Information Manager (AIM).
2. Submit documentation using the link received after you submit the application.
3. Schedule a meeting with Dayna Geary, SDS Coordinator for Johns Hopkins Engineering Executive and Professional Education, to discuss your needs as well as potential accommodations and services.

Please review the [Documentation Guidelines for Individuals with Disabilities](#) for more information on supporting documentation.
